

**EMERGENCY PREPAREDNESS WORKSHOP:**

# **Stay? or Go?**

**(Recognizing the Signs to know when to Evacuate)**

**Presented By: Jon Sherman**

# Disasters

---

- Events may occur, that can make the environment around you unsafe.
- They can happen: to Anyone, Anytime, Anywhere
- This problem can be made worse when surrounded by those who are not prepared and look to you for help.
- Much worse is it when large numbers of people in a city are not prepared and start to suffer.

# Home

---

- Stay at HOME if you can.
  - Your home is your best shelter.
  - Home has all your supplies.

# Problems in Cities

---

- Cities are not self-sustaining.
- They don't have enough resources to support the population.
- Resources from other areas are needed to keep a city supplied. These include, Food, Water and Electricity.
- Cities are not self-sufficient and would run out of supplies in about a week if supplies were disrupted.

# Problems in Cities

---

- 5 major risks may take place during a crisis in a city.
  1. Loss of Power
  2. Lack of Food
  3. Lack of Water
  4. Quarantine
  5. The Collapse of Social Order
- Sometimes the mere threat of one of the above is enough to cause concern or even panic.

# Evacuate

---

- So...Some disasters may force you to leave your home.
- You may have plenty of notice.

# Evacuate

---

Or NO time at all...

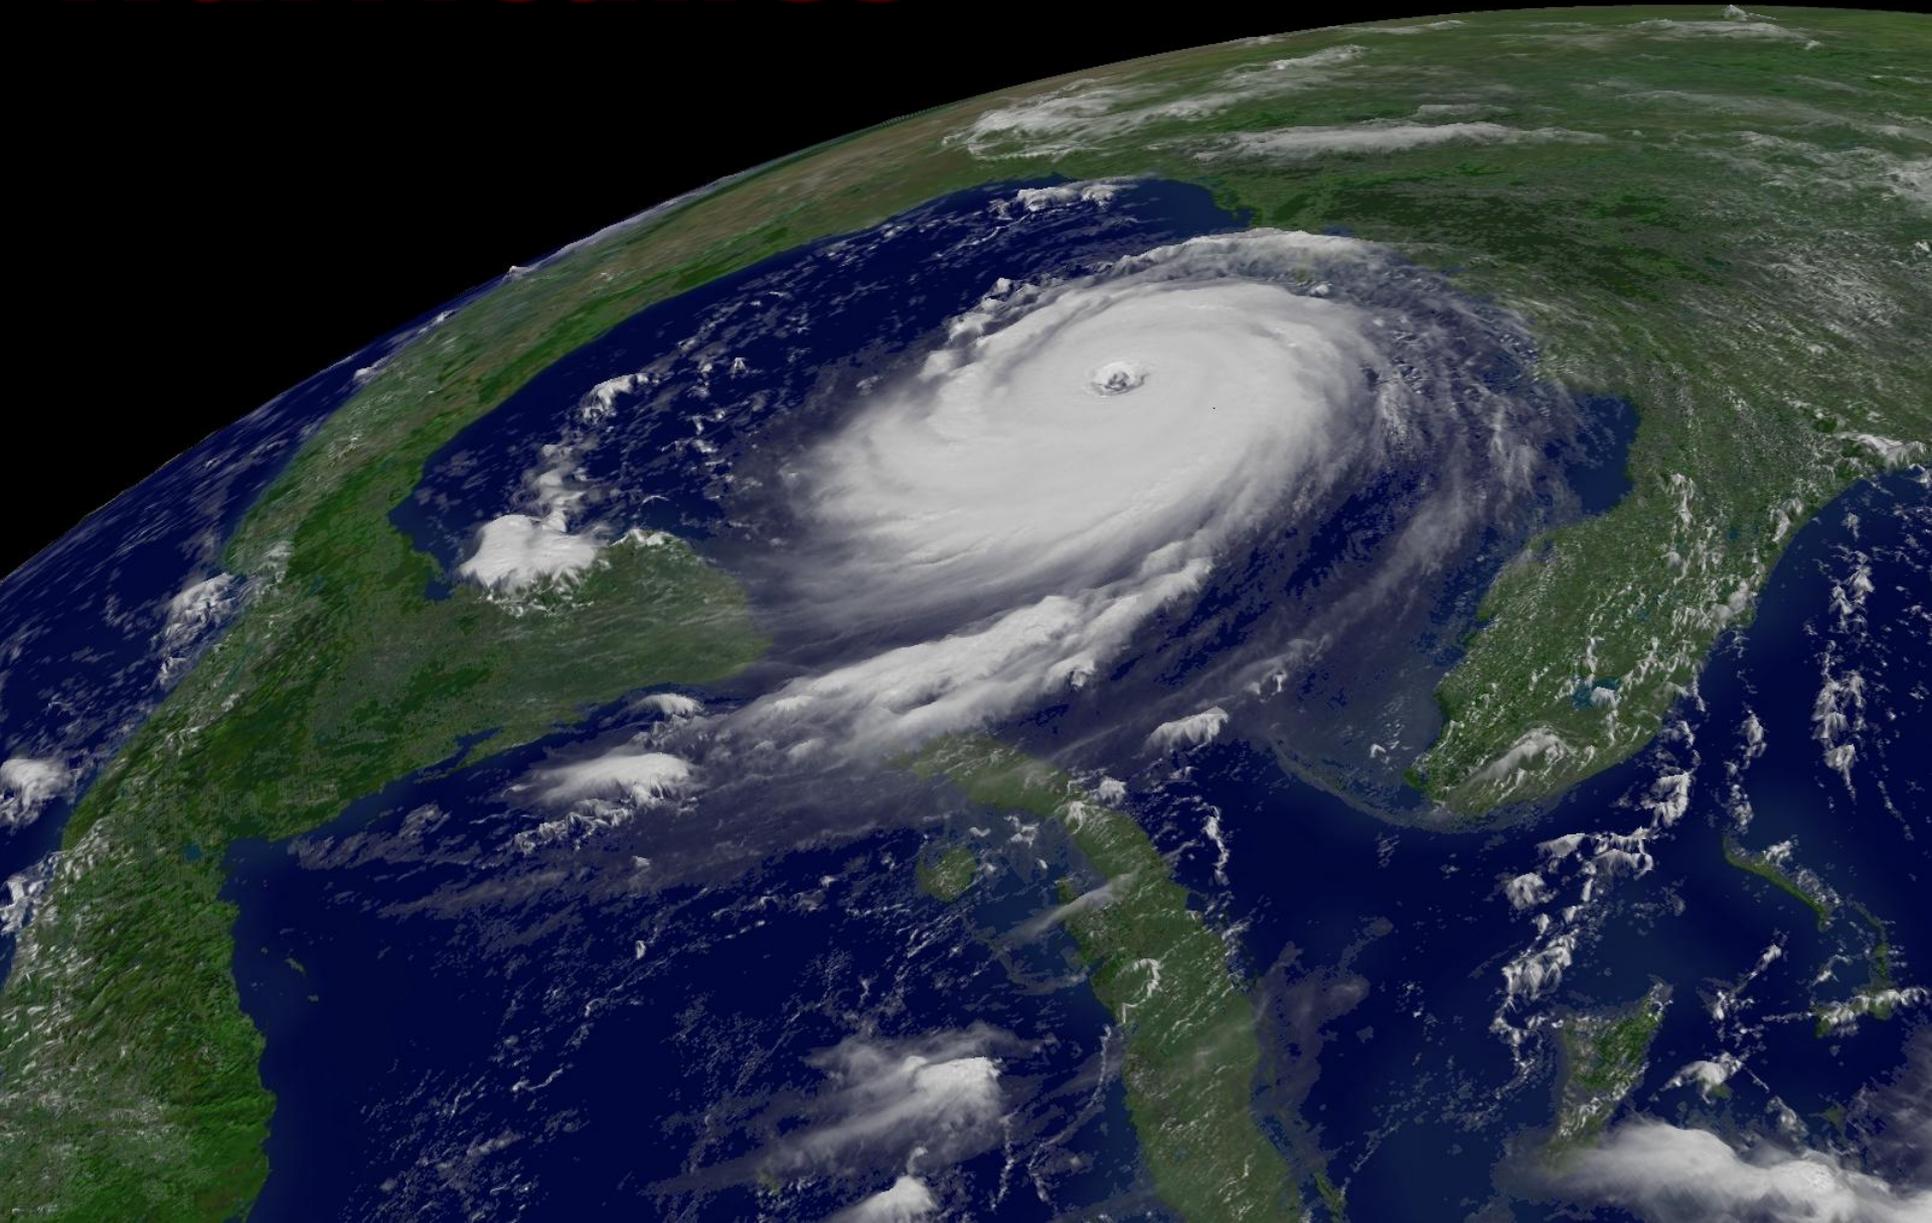

# Evacuate

---

- Lets look at some of the possible reasons that might cause us to evacuate.

# Hurricanes

# Riots

# Volcanic Eruptions

# Tsunami

# Tornados

# Shortages

# Pandemic

Fire

# Earthquakes

**Gas Leak**

**War**

# Floods

# HazMat Spill

# Stay? or Go?

---

How do you know whether you should stay or go?

Emergency Alert System

# EAS / NWR S.A.M.E.

---

- NOAA Weather Radio All Hazards (NWR) is a nationwide network of radio stations broadcasting continuous weather & emergency info. NWR also broadcasts warning & post-event info. for all types of hazards - including natural (ex. earthquakes or avalanches), environmental (ex. chemical releases or oil spills), and public safety (ex. AMBER alerts or 911 Telephone outages).
- Broadcasts are found in the VHF public service band at these 7 frequencies:

162.400 MHz	162.425 MHz	162.450 MHz	162.475 MHz	162.500 MHz	162.525 MHz	162.550 MHz
----------------	----------------	----------------	----------------	----------------	----------------	----------------

Phoenix

NWR Radio Frequencies All states: <http://www.weather.gov/nwr/indexnw.htm>  
AZ NWR Radio Frequencies <http://www.weather.gov/nwr/CntyCov/nwrAZ.htm>

# EAS / NWR S.A.M.E.

---

- Instructions over the NOAA/EAS radio network can give you important information like up-to-date conditions, directions or shelter locations.
- You might be directed to shutoff your utilities.

# Reverse 911

---

- Instead of you calling 911 to report an emergency, Emergency Services, knowing there is an emergency in your immediate area, can call you.
- All land lines are already connected as they are tied to a fixed location...your home. (CenturyLink, Cox)
- Cell phones and VoIP phones can also be registered at:

<http://www.maricoparegion911.org/index.htm>

# Some Warning Signs

---

- Loss of Power
  - Applies to wide-scale outages
  - At first, power outages have a novelty about them. This quickly disappears as the outage lasts more than a couple hours.
  - Without power...banks, gas stations and other business will be closed.
  - Looting begins as the most unprepared run out of resources and those who feel they can get away with it, start to loot.
  - Looting will start with businesses and move to suburban residential areas within a couple days.
  - Leave town early.

# Some Warning Signs

---

- Lack of Food
  - Grocery stores have about a 1 week supply of food, with more shipped in daily.
  - With no food shipments, panic can set-in within 3 days.
  - Within minutes of news that food shipments will stop or slowdown, a mad dash of customers will purchase the necessities in the stores until they are completely depleted.
  - Once it is evident the shortage will last for more than a week, a mass exodus will begin.
  - Looting will begin; first businesses, then homes.

# Some Warning Signs

---

- Lack of Water
  - People can live without water for only 2-3 days
  - Loss of Power = No Water. Water treatment plants and pumping stations depend on electricity. Generators are temporary.
  - Homeland Security recognizes our water supply as the easiest, most susceptible and largest-impact target to would-be terrorists.
  - By day two, people will get very worried. All bottled water will be purchased from the store leaving the shelves bare.
  - As no water is available at stores, a mass exodus will begin.
  - Looting will begin; first businesses then homes.
  - Any local water supply, lakes, streams, rivers, canals will become polluted as sanitation breakdown occurs. A mass outbreak of water-borne diseases will occur.

# Some Warning Signs

---

- Quarantine

- Sometimes you may not have the option to leave town.
  - Quarantines or curfews may be imposed to control disease outbreaks or control widespread disturbances.
- Watch for the signs and leave town before the option to do so is taken away from you.
  - For Quarantines, ER's will fill up quickly and schools will shut-down first.
  - Curfews will be imposed to control riots or wide-scale looting.
- Those without proper supplies (Food, Water, Medicine, etc..) could begin looting or rioting if supplies are not made available.

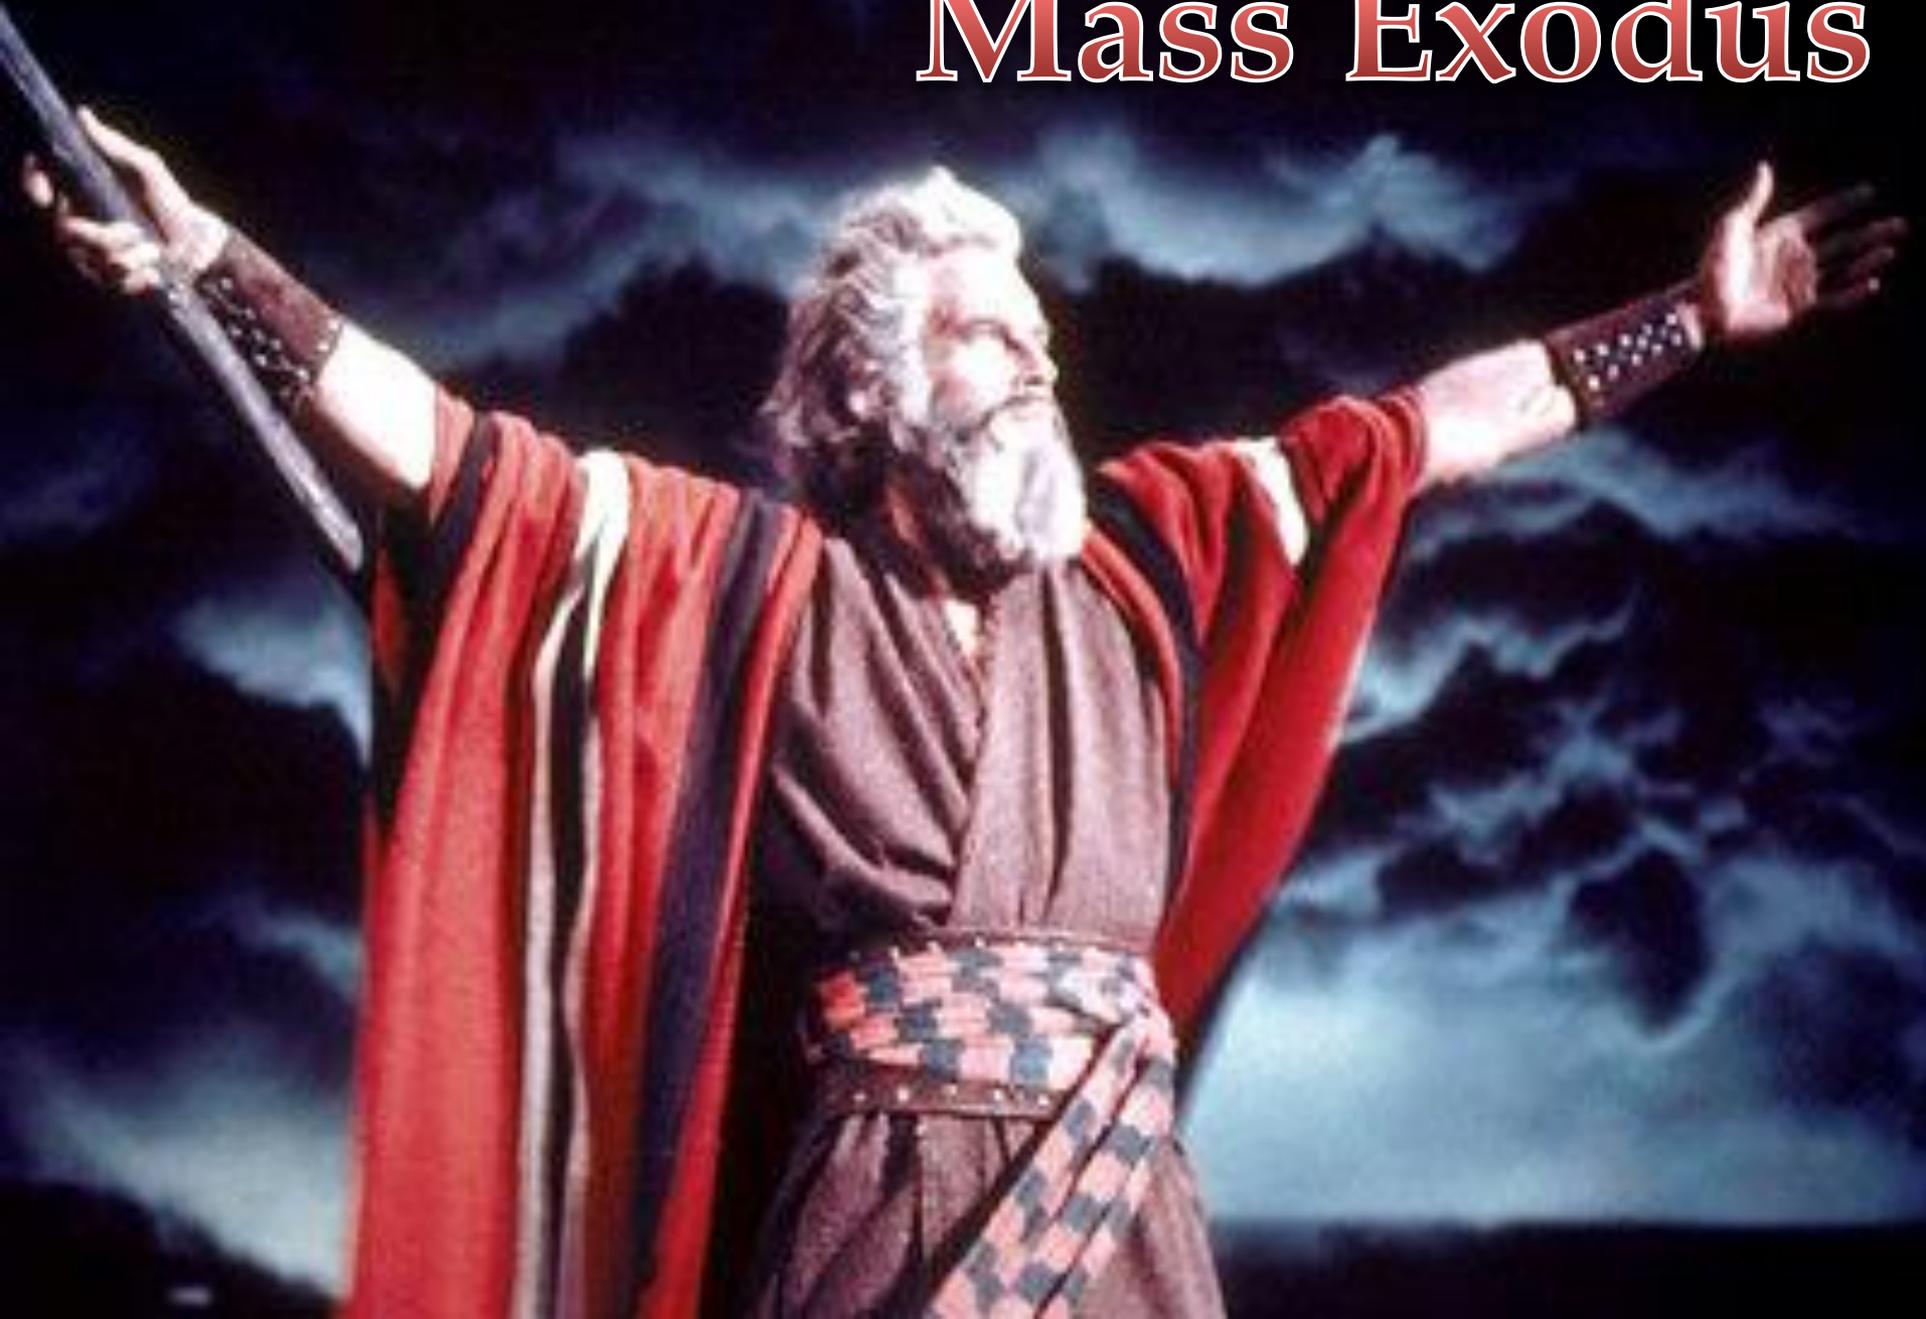

# Some Warning Signs

---

- The Collapse of Social Order
  - The L.A. Riots following the Rodney King trial verdict
  - New Orleans after Hurricane Katrina
  - Once the people realize emergency services are overwhelmed or non-existent, the psychological barrier of “order” melts away and lawlessness can take over.
  - What leads to the collapse of social order? Lack of Food, Water, Utilities or Money or the threat thereof.

# Mass Exodus

# Mass Exodus

---

- As people leave the cities, en masse. Gas stations will close as their employees leave town as well.
- Those that stay open, will be quickly depleted.
- People will only be able to travel as far as their tank of gas will take them.
- Mass traffic jams will occur on the outbound highways as people run out of gas and abandon their vehicles.
- If bad enough, this could actually block the highways and trap people in the cities. (Ex. Hurricane Rita)
- As people become desperate, looting will take place within a gas tank radius of the city.

Leaving Town

# Leaving Town

---

- Know where you are going. Have an out of town friend or family member that will take you in.
- Roads may be blocked, off-roading may be necessary (Leave early to avoid this)
- You will need lots of supplies, plan ahead and have supplies ready (Larger car/trailer is helpful) or supply caches along your escape route
- Fuel: If you don't have enough, you can't go far. (Ideally store enough fuel to reach your destination or 2 tanks full)
- Don't travel alone, plan on leaving in small to large groups.

# Dangers of Leaving Town

---

- You're severely limited in how much you can carry.
- You have limited range due to fuel.
- You expose yourself to social chaos, roadblocks, random violence, etc.
- Your house may be looted while you're gone.
- You run the risk of mechanical breakdowns of your vehicle.
- You must have a place to go that you know is in better shape than where you currently are.

*Sticking Together*

# Sticking Together

---

- If you are forced to stay, it is impossible for you to face looters or gangs by yourself.
- Neighbors may work together to protect the entire neighborhood.
- Organized resistance will encourage gangs or looters to go where there is minimal resistance.
- Supplies may be traded to unprepared neighbors in return for help with the protection effort.
- To avoid your neighbors from being the threat, help them be informed and get prepared.
- Every neighbor, church member or family member that is prepared is one less person you'll have to support.
- Prepare enough to Share!!!!

# Things to Consider

---

- Get Prepared!
- Start with the Basics.
  - 90 Day Food Supply
  - Water
  - Free from Debt
  - Long Term Food Storage
- Don't Panic or Encourage Panic in others.
- Be aware of the warning signs.
- Get out of town early.
- Plan ahead, know where you are going, be ready.
- Befriend your neighbors, help them prepare.

# Evacuation Plan

# Evacuation Plan

---

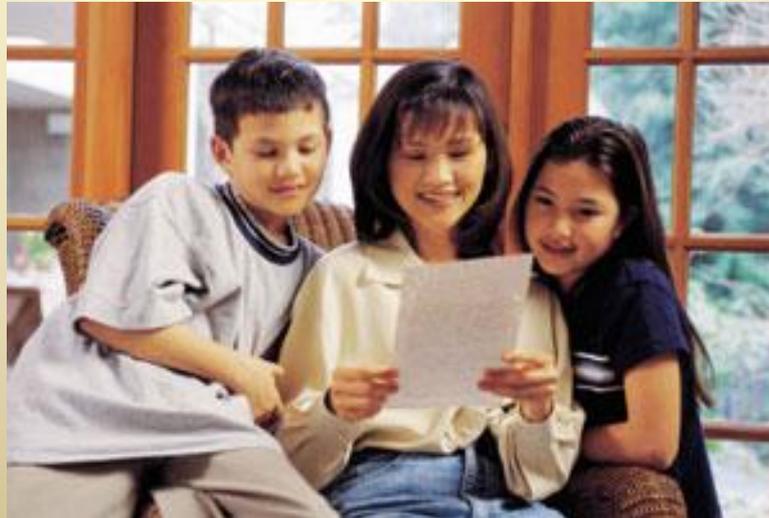

- If you are forced to evacuate, you most likely won't have the time to stop and buy the appropriate maps and plan your route or communicate with family.
- Make your plans NOW where you will regroup if separated and what routes you will take.
- Review the plan at:  
[http://www.iwillprepare.com/index\\_files/Evacuation\\_Plan.htm](http://www.iwillprepare.com/index_files/Evacuation_Plan.htm)

# Plan For Your Area

---

- First!....Prepare for emergencies that are most likely to occur.
- Make a list of possible emergencies & rate them in order of likelihood.

# Possible Emergencies

---

- Utility Outage (Power, Water, Gas)
- Financial Setback
- Loss of Employment
- Car Trouble or Accident
- Microburst or other storm
- Medical Emergency
- Missing Child
- House Fire
- Gas Shortage
- Transportation Disruption
- Shipping Strike
- Hazardous Materials Spill
- Gas Leak
- Tornado
- Satellite malfunction preventing Debit/Credit Card Transactions
- Plane Crash in Neighborhood
- Mass Migration (From North AZ Forest Fires or CA Earthquakes)
- Earthquake
- Volcano
- Water Contamination
- Pandemic (Bird Flu?)
- Terrorist Attack
- Palo Verde Nuclear Plant Meltdown
- Flash Flood (Dam Failure)
- Forest/Brush Fire
- War

# Possible Emergencies

---

Town of Gilbert, Arizona

Department of Emergency Management

12 Areas of Focus in Developing Gilbert's Emergency Response Plan

(12 Events Identified as Most Likely to Occur in Gilbert)

- 1. Poor Air Quality
- 2. Civil Disturbance
- 3. Common Carrier Accident  
(Plane, Train, Car, Bus, Etc..)
- 4. Earthquake
- 5. Power Outage
- 6. Fire/Explosion
- 7. Hazardous Material Spill
- 8. Heat wave
- 9. Pandemic Influenza
- 10. Palo Verde Disaster
- 11. Storms/Floods
- 12. Terrorism
